The Digital Skills Gap in Europe

Digital technologies are used in many sectors such as farming, healthcare, transport, education, retail, automatics, energy, shipping, logistics, teaching and the information and communications technology industry. The demand for information and communications technology specialists is growing fast. In the future, 9 out of 10 jobs will require digital skills. At the same time, 169 million Europeans between 16 and 74 years – 44% – do not have basic digital skills.
