**High-Tech Leadership and Innovation Skills**

**High-Tech Leadership and Innovation Skills** | Estimation of Demand, Supply and Forecasting: Approach, Methodology and Results

22 November 10:00 - 17:00

New digital and key enabling technologies will generate new market opportunities and will foster new and sometime disruptive business models. Enterprises of all sizes and in all sectors require the availability of new skills at all levels – especially at the leadership level – to fully exploit these technologies and for Europe to become a better place to invest and do business. Not surprisingly these skills are in very high demand globally. The demand cannot be met by the current supply from education and training institutions.

More information is available on the Scale Project [website](#).
